

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Recently retired, after spending several years working with his brother to assemble their crane business into an market leader, John had no idea that fatefull trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction services.

After their return from holiday, John set up a partnership with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into a number of international markets and continues to cultivate modern machines to ensure that clients are able to become safer and more well-organized within their workplace.
