

Aerial Work Platform

Aerial Work Platforms - There are a variety of lift truck accessories offered on the market. They can help transform your forklift so that you can expand your ability to pick items up or finish clean up tasks and material handling with out difficulty.

Lots of the accessories are specially designed in order to fit on the forks themselves. Blade extensions for example, are used if you need more blade length, that increases lifting capability. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are one more type utilized when transferring rolled material to be able to make sure it does not roll off of the standard flat forks.

Examples of lifting accessories comprise pivoting and telescoping crane or boom accessories. They can come in a number of various styles and are most often intended for moving lumber, poles, metal bars and various sort of bulky things. Other accessories like different kinds of hook plates and hooks are obtainable in order to lift things with a sling or chain. Slab lifters and magnetic filters are other things that can be used with hook accessories. Slab lifters are specialized attachments that are meant for picking up a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your forklift to make transporting rolls of carpet easier. The attachment hooks onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are various types of forklift accessory intended for facility maintenance such as snow forks. These industrial forks can be attached to front end loaders and designed for transporting materials like for example snow, dirt as well as mulch. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers comprise a broom that the forklift blades connect onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and easy.

A material spreader is another lift truck attachment that is often utilized at facilities. These spreaders are handy for a variety of applications like for instance spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Another optional lifting accessory are work platforms. These can be utilized by several various companies daily. Platforms may vary in size from 36" x 36" to up to 60" x 60". Several units may be offered and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location utilizing the forklift. Larger platform units have extra space for employees in order to carry tools and other essential items meant for the task. Usually work platforms are constructed of poly material or steel.
