The U.S. forklift division situated in Cleveland has a skilled team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a home-based equipment expansion project. Product sales of these products were initially targeted to state-run firms, large scale corporations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and quickly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of significant expansion of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
