Clark has five main lines of forklifts across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specific items intended for 20 unique designs of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your parts requirements offered by Clark Totalift.

Clark features a exceptional Parts Supply team. The components warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most amazing dealer support networks. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the material handling market.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark's continual mission to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the world to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their production plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has selected the structure of "Lean Production" at all of its assembly plants for the reason that this method is extremely economical and allows for minimal use of resources. Developed to guarantee maximum efficiency, this system is intended to discover and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to enhance the proficiency and brilliance of their merchandise while minimizing costs. The new value engineering agenda combines innovative product development and provides improved customer support and service within the industry.
